

## How to create free curve and path line

### Introduction

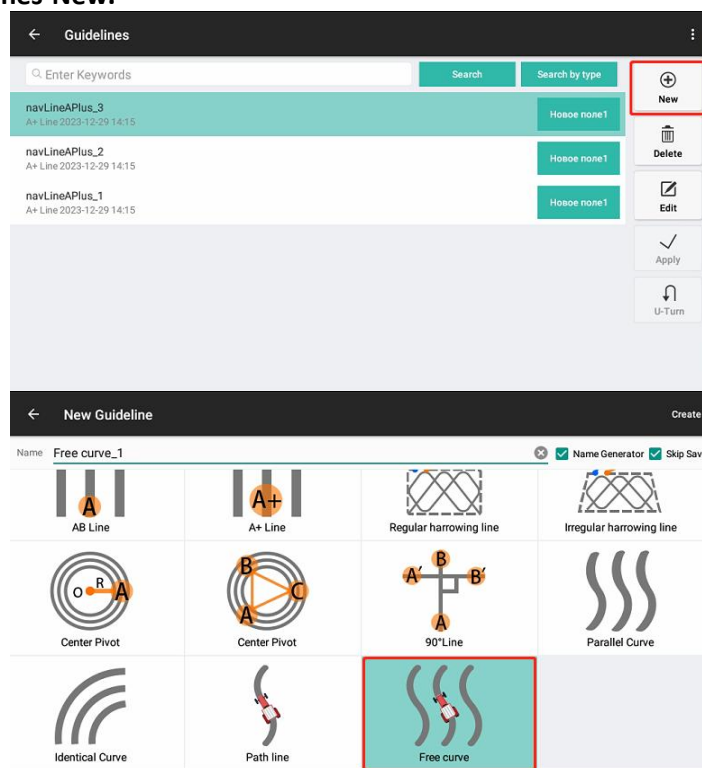

With the free curve mode, it can support to combine the straight line and curve line, also it is with optimized algorithm so the curve line will be more stable and it is recommended to use instead of parallel curve and identical curve.

With the path line mode, users can create the guideline with the actual trajectory of the vehicle.

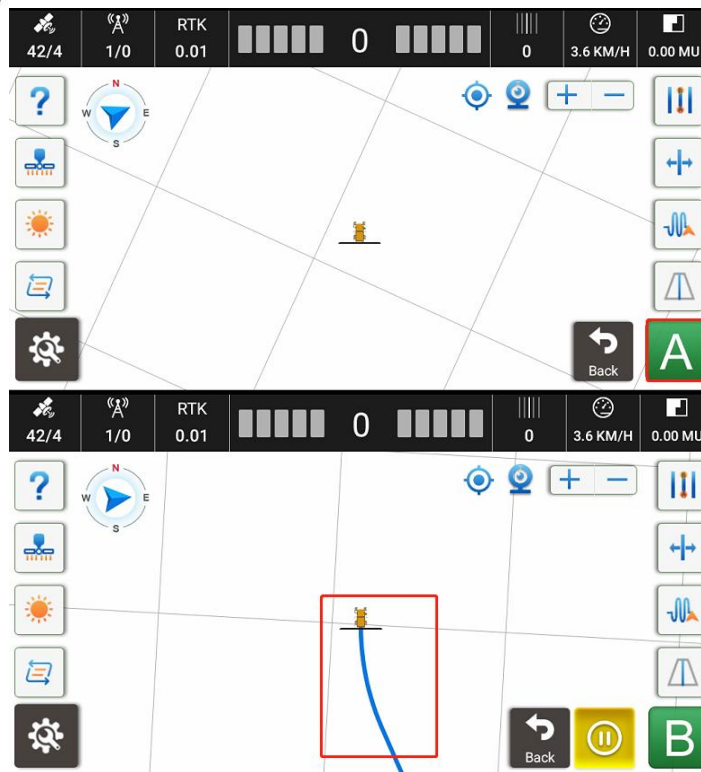

### Steps

#### Free curve mode

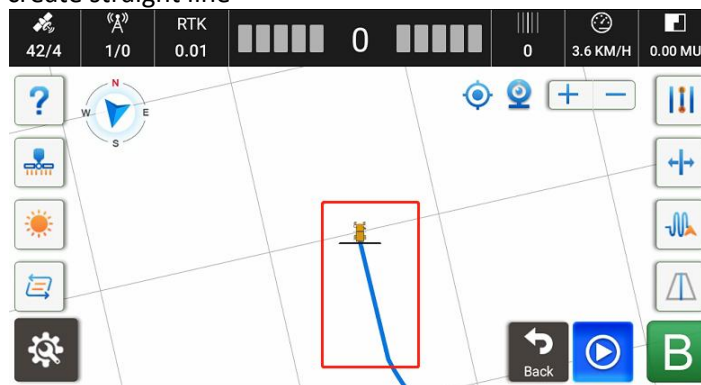

1. Go to **Guidelines-New**.

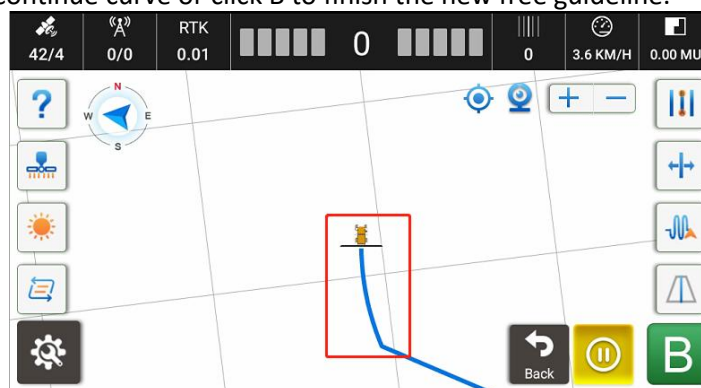

2. Click A to create curve line,

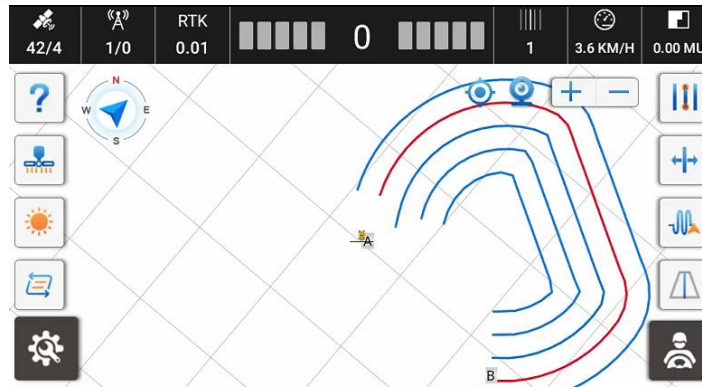

3. Click Pause to create straight line

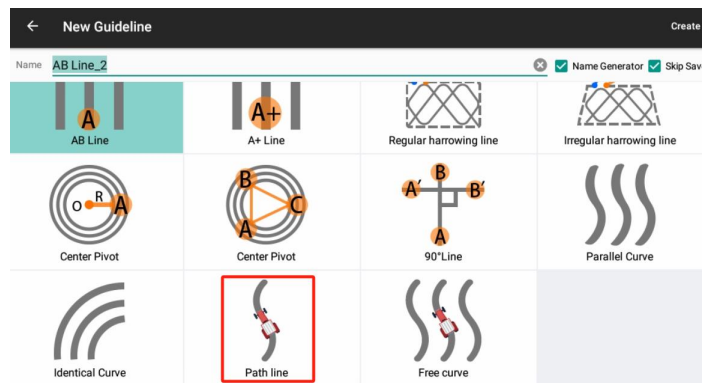

4. Click Start to continue curve or click B to finish the new free guideline.

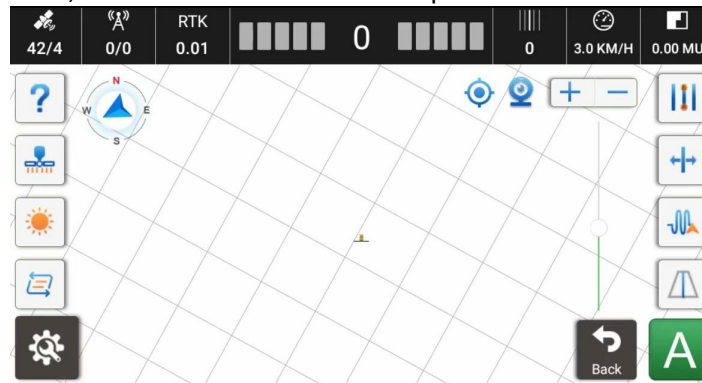

## Path line mode

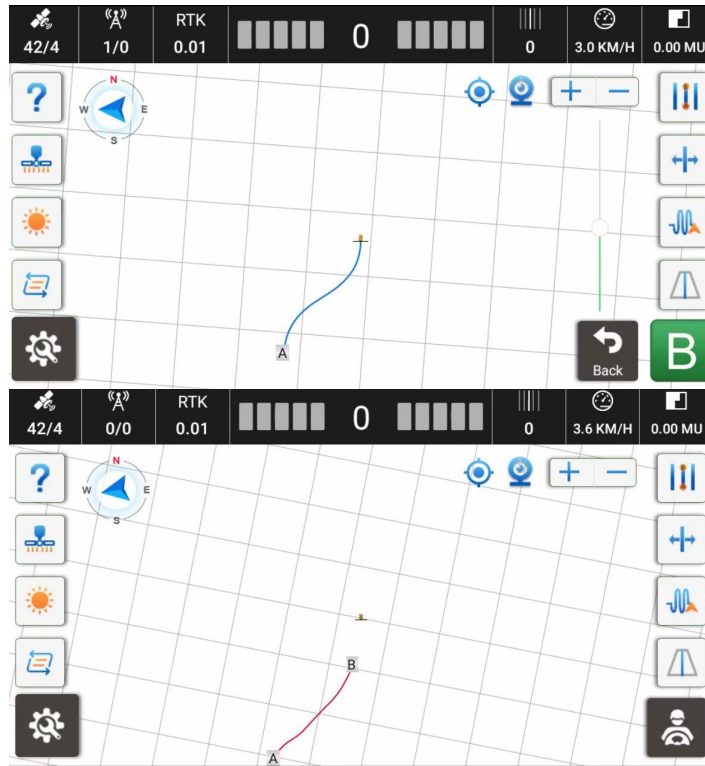

1. Select the Path line mode and click Create

2. Click A to start the line, then drive the tractor to end point

3. Click B to end the line when arrives at the B point
